Only 50% students had appeared for online examinations (internal examinations) with mobile real-time monitoring. Majority of students (54.2%) were uncertain of having uninterrupted internet for 4 hours of real-time monitoring during University Examinations.

Majority of students wanted additional training to be able to appear for University Examinations during the lockdown. However 81.5% students were comfortable using the Microsoft Teams application to appear for the examinations.

Ability to convert scanned images into a pdf using mobile was admitted to by 83.7% students.

Action Taken:

It was decided to institute Training for all students in the process of examinations

The lack of internet connectivity was communicated to the examination section to be able to better plan mode of examination.
