

Research Workshop for UG Students

Department of Community Medicine has adopted innovative project-based learning to acquaint the U.G. students with basic research methodology. To encourage student's participation in Community oriented health problems, and their inventions, the Structured UG Short Term Research Projects are executed by 6th semester MBBS students:

Phase I: Orientation to Short term research project & Research methodology

Phase II: Assessment through MCQ'S

Phase III: Project Commencement - Identification of Guide & Protocol
Submission

Phase IV: Project Execution under Faculty supervision

Phase V: Intervention & Recommendations

Phase VI: Assessment of project by MCQs

Phase VII: Execution of Intervention in selected projects

Under supervision of faculty, team of 5-6 students conduct one research project. After submission of a project, each student is awarded with Basic Introductory Training to Medical Research (BITMER) certificate by our department. Up till now 880 students had participated in 177 projects.
